PROFESSIONAL SUMMARY

Computer Science Engineering graduate with a strong interest in building practical software solutions and learning how real-world applications work. Hands-on experience developing full-stack web applications, backend services, Android applications, and database-driven features through internships and personal projects. Enjoys turning ideas into functional applications, connecting frontend interfaces with backend services, and solving technical problems through debugging and testing. Experienced in building and working with REST APIs, CRUD-based systems, and dynamic admin functionality. Comfortable exploring new technologies and using modern development tools to improve productivity and solve problems efficiently. Strong logical thinking, curiosity, and attention to detail with a genuine interest in software development and technology. Looking to start a career where I can contribute, learn quickly, and grow as a software professional.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL

Development: React.js, Node.js, Express.js, REST APIs, HTML5, CSS3

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code

Analytics: Microsoft Excel, Power BI

EXPERIENCE

MindMatrix Organisation

Android App Development Intern

Feb 2026 – May 2026

Bengaluru / Remote

- Developed Android application screens, navigation flows, and feature functionality using Kotlin and Android Studio.
- Worked on database-driven application functionality and validated application workflows during development.
- Performed functional testing and debugging to identify issues and verify fixes across application features.
- Used Generative AI tools to support requirement understanding, debugging assistance, testing, and technical documentation.

1Stop.ai

Back-End Developer Intern

Jun 2025 – Sep 2025

Bengaluru / Hybrid

- Developed backend modules involving database operations, CRUD functionality, and REST-based application workflows.
- Worked with API-driven functionality and database operations to support application features and data management.
- Validated API and backend workflows using testing and debugging techniques to identify and troubleshoot issues.
- Worked with MySQL to manage and verify application data during backend development.

PROJECTS

Skinmatics – Full-Stack Skincare Appointment Platform

React.js, Node.js, Express.js, MongoDB | 2026

- Developed and deployed a full-stack skincare appointment platform with user interactions, appointment booking, enquiry management, and an admin dashboard.
- Implemented REST APIs, CRUD operations, and MongoDB database integration for managing application records and user workflows.
- Built an admin-controlled system where authorized users can update information such as doctor details directly from the dashboard without changing the source code.
- Integrated frontend and backend workflows and used AI-assisted development tools for feature implementation, debugging, code understanding, and testing.

CloudVault – File Management Web Application

React.js, Node.js, Express.js, MongoDB | 2026

- Developed a file management application for uploading, storing, viewing, downloading, renaming, and deleting user files.
- Implemented folder management functionality to organize files and support creating, renaming, moving, and deleting folders.
- Built backend APIs and database operations for user accounts, file metadata, folders, and file management workflows.
- Integrated frontend and backend services and used AI-assisted development tools to support feature development, debugging, and testing.

EDUCATION

Cambridge Institute of Technology, Bengaluru

B.E. in Computer Science Engineering

Aug 2022 – May 2026

CGPA: 8.0/10

CERTIFICATIONS

- Software Engineer Certification – HackerRank
- Introduction to React – IBM SkillsBuild
- Claude 101 – Anthropic
- Data Analytics Essentials – Cisco Networking Academy
- Data Analyst Fundamentals – Deloitte
