## PROFESSIONAL SUMMARY

Adaptable and motivated Computer Science Engineering graduate with hands-on experience working in team environments, supporting projects, organizing information, and handling technology-driven tasks. Enjoys taking responsibility, learning new processes quickly, and finding practical solutions when faced with unfamiliar challenges. Comfortable coordinating tasks, maintaining documentation, communicating updates, and working with different types of people and tools. Brings a combination of technical understanding, business awareness, problem-solving ability, and a willingness to learn beyond academic knowledge. Interested in understanding how teams, processes, and businesses operate and contributing wherever support is needed. Known for being curious, dependable, detail-oriented, and open to taking on new responsibilities. Looking to begin a professional career where I can contribute to the team, gain real-world experience, and grow across business and technology functions.

## CORE SKILLS

**Technical:** Python, JavaScript, React.js, Node.js, REST APIs, MongoDB  
**Operations:** Workflow Coordination, Process Tracking, Documentation, Task Management  
**Analytics:** Data Analysis, Data Cleaning, Data Validation, KPI Tracking, Reporting  
**Tools:** Microsoft Excel, Power BI, Power Query, SQL, MySQL, Google Sheets  
**Professional:** Communication, Teamwork, Problem Solving, Attention to Detail

## EXPERIENCE

**MindMatrix Organisation** Feb 2026 – May 2026  
Android App Development Intern Bengaluru / Remote

- Worked with application data, database-driven workflows, structured records, and project documentation during application development.
- Maintained structured project information, tracked tasks, monitored workflow progress, and organized updates to support smooth project execution.
- Used spreadsheets and digital tools for task planning, reporting, documentation, workflow management, and project coordination.
- Used Generative AI tools to support requirement understanding, documentation, issue tracking, debugging assistance, and productivity improvement.

**IStop.ai** Jun 2025 – Sep 2025  
Back-End Developer Intern Bengaluru / Hybrid

- Worked with structured datasets, database records, CRUD operations, and application workflows to support project activities.
- Used MySQL and database queries to manage, retrieve, and verify application data during backend development.
- Assisted with data validation, record management, reporting, documentation, and workflow tracking.
- Supported issue tracking and maintained accurate project information while coordinating data-related activities.

## PROJECTS

**Skinmatics – Full-Stack Skincare Appointment Platform** React.js, Node.js, Express.js, MongoDB | 2026

- Developed and deployed a full-stack skincare appointment platform with user interactions, appointment booking, enquiry management, and an admin dashboard.
- Implemented REST APIs, CRUD operations, and MongoDB database integration for managing application records and user workflows.
- Built an admin-controlled system where authorized users can update information such as doctor details directly from the dashboard without changing the source code.
- Integrated frontend and backend workflows and used AI-assisted development tools for feature implementation, debugging, code understanding, and testing.

**CloudVault – File Management Web Application** React.js, Node.js, Express.js, MongoDB | 2026

- Developed a file management application for uploading, storing, viewing, downloading, renaming, and deleting user files.
- Implemented folder management functionality to organize files and support creating, renaming, moving, and deleting folders.
- Built backend APIs and database operations for user accounts, file metadata, folders, and file management workflows.
- Integrated frontend and backend services and used AI-assisted development tools to support feature development, debugging, and testing.

## EDUCATION

**Cambridge Institute of Technology, Bengaluru** Aug 2022 – May 2026  
B.E. in Computer Science Engineering CGPA: 8.0/10

## CERTIFICATIONS

- Software Engineer Certification – HackerRank
- Data Analyst Fundamentals – Deloitte Virtual Experience Program (Forage)
- Data Analytics Essentials – Cisco Networking Academy
- Claude 101 – Anthropic
- Machine Learning – Infosys Springboard
- Introduction to React – IBM SkillsBuild
